Compass for Windows User Guide

Certiport exam delivery system (Windows only)

© Copyright 1996-2025 Pearson Education Inc. or its affiliate(s). All rights reserved. Property of Pearson VUE 25.5.1 / May 2025

Guide Overview

Compass® is Certiport's exclusive exam delivery system that provides a state-of-the-art experience to Test Candidates through a secure browser. The Compass for Windows software delivers a simple and easy way to launch a Certiport certification exam in multiple languages using local software licenses. Compass' lightweight technology reduces the size and number of downloads and provides a simple, userfriendly interface, while continuing to access the same Certiport tools and services currently available in the Certiport Portal. Compass for Windows is intended to be used in-person at a Certiport Authorized Testing Center (CATC) with the Proctor and the Test Candidate in the same room.

This document explains how Administrators download and install Compass onto candidate workstations prior to a testing event. It also explains how Test Candidates sign up for exams and select the payment type. Proctors then authorize the exams to start, and Test Candidates begin and complete their exams.

If you do not have the means to deliver our Live-in-the-Application (LITA) exams, please check out our <u>Compass Cloud</u> delivery model.

Administrator rights

Technical requirements

The Exam delivery workstation must meet the minimum requirements to deliver an exam. See the <u>Compass for Windows Technical Requirements</u> on the Certiport website for details.

Microsoft Office shared license

If your Certiport Authorized Testing Center (CATC) employs a shared license model for the Microsoft Office software (required to be locally installed on the testing workstation when administering MOS <u>Live-in-the-Application/LITA</u> exams), please see the <u>section</u> in this document under the exam launch pathway.

Administrator rights

Local Windows Administrator rights are required to <u>install</u> Compass, configure the <u>settings</u>, and administer local exams. For even more detail on why local Admin rights are required, see the <u>Admin Rights guide</u>.

Download & Install Compass

Download the installer

Install Compass

Download the installer

The Organization Administrator or Organization Member (associated to an authorized testing center) must download the Compass installer.

1. Open a web browser and navigate to <u>www.certiport.com</u> and log in as an Organization Administrator (or Organization Member).

A Certiport Org Admin or Org Member can download the installer, but a local Windows Administrator is required to install it.

2. Select the **Exam Delivery** tab and then select **Compass**.

3. Click the **Download Compass** (for Windows) button.

- 4. Open Windows Explorer and navigate to the Downloads directory.
- 5. Select the **Compass_Setup.exe** installer and **Move it** to the workstation's **desktop**.

Download & Install

Download the installer

Install Compass

Compass

Install Compass

The Certiport Authorized Test Center IT Administrator installs the Compass application on each exam delivery workstation (local Admin rights required).

This section of the document describes how to install Compass on individual exam delivery workstations, one at a time. IT Administrators have various options for mass deploying Compass to multiple workstations. See the <u>Compass Mass Deployment for Windows</u> document for details (for advanced users only).

- 1. Locate the **Compass_Setup.exe** file on the desktop and hit the **Enter** key on the keyboard or **double-click** it to launch the executable.
- 2. Click Yes in the User Account Control dialog box.
- 3. Select the desired **Language** from the drop-down list and click **Next**.

Configuration & Administration

This section describes all the processes that must be performed by the IT Administrator or the Organization Administrator. These procedures include:

- Configuring the test center settings, including:
 - Selecting the testing center
 - Selecting the user interface language
 - Setting the Windows administration credentials in advance preventing the Test Candidate from exploiting the credentials
 - Configuring the LAN settings for test center updates
 - Configuring the test center update frequency
 - Configuring the proxy settings for how Compass will connect through a proxy server
- Performing system checks
- Managing exams to be delivered at the test center
- Managing the inventory at the test center
- Running test system updates
- Exporting and importing updates at the test center
- Logging out of the system

Configure test center settings

The IT Administrator configures all the desired test center settings. Follow the instructions in this section to configure the server, testing center, user interface language, admin credentials, LAN settings, update frequency, and proxy server. The IT Admin must also be a Certiport Organization Administrator.

1. Select the **Compass** short-cut and hit **Enter** on the keyboard, or **double-click** the short-cut with the mouse to launch Compass.

Compass	© Compass	-	•	×

Import/export update utility

Configure LAN settings (optional)

The IT Administrator can configure the LAN settings if they wish to employ this feature. LAN Mode allows updates to be distributed with your institution's local network, making it easier for CATCs with limited bandwidth to stay up to date. CATCs with very large testing labs also save time since updates are distributed automatically whenever new updates are released. A single computer at your institution is designated as the "Compass Server", to which both system and applicable exam content updates are downloaded via the internet. All exam delivery workstations are then designated as "Compass Clients", which connect to the Compass Server locally, and automatically checks and obtains any new updates whenever the Compass software is launched.

1. Scroll down to the LAN Settings section.

- 2. Select one of the three configuration options:
 - **Stand Alone:** This is the default option. Use this configuration if you do not want to employ the features of the LAN Solution feature.
 - **Compass Server:** Select this option for the sole computer designated to receive all updates via the internet, then distribute them via the LAN. (The workstation designated as the Server cannot administer exams.)
 - **Compass Client:** Select this option for all remaining exam delivery workstations. They only look to the Compass Server when any new updates are detected, they do not connect online.
- 3. Set the **Compass Server** settings. **Stand Alone** LAN Settings Server Stand Alone **Compass Server** O Compass Client Client Server Address 255.255.255.255 ਨੋਟ Server Port 52525 ✓ You can see what mode you are in with the System Check feature or by identifying the icons shown above in the footer of the Compass application.

- 2. Select how frequently you want to run **Updates**: Daily, Weekly, or Manual.
- 3. Identify the **time** of day you want to run the updates. Use the following 24-hour format: HH:MM
 - Daily: Every 24 hours at the specified update time
 - Weekly: Every 7 days at the specified update time
 - **Manual:** Notifies the Admin that updates are available and indicates the nature of any pending updates via the **Updates** menu. CATCs employing a manual frequency must manage updates on an individual basis for all workstations in the lab.

Note

The time displayed in the updates section defaults to the time that Compass was installed. When employing LAN Mode, the server updates at the frequency specified in the settings, while the clients check for updates present on the server whenever the software is launched.

Note	

All exam content downloaded to the Compass Server will be pushed to each Compass Client machine, even if those machines do not have the required software installed.

Restoration software such as "Deep Freeze" will undo the ongoing application of updates. If your CATC uses restoring software, a thaw space must be created for Compass. See our <u>FAQs</u> for more information.

Inventory

Run system updates

Import/export update utility

In Pathway updates

Should an update be available during exam selection, it is downloaded automatically. Since an "In Pathway" update only occurs when a Test Candidate is attempting to launch an exam, this type of update can be performed at that exact time without switching to an Organization Administrator. The exam cannot launch until the update has finished downloading and installing.

Updates that may be pending to the Compass software (system updates) do not prevent an exam from being launched, but we recommend you perform them for the best testing experience.

In pathway updates rarely occur in LAN mode, since the workstation automatically checks, downloads, and installs any pending updates when the software is launched. If an update does occur in LAN mode, it will download and install as described above.

- 5. Enter the **Username**, **Password**, and **Confirm Password** for the account on the proxy server (optional you could have a proxy server but not require authentication).

Finalize settings

- 1. Click the **Save** button to apply all settings entered. Compass automatically restarts.
- 2. Log in again and continue to the **Manage exams** section.

CertiportNow service

At the bottom of most screens is the **CertiportNow** button, which manually launches the Windows service if needed.

This service allows all updates (both System and Exam Content) to run in the background if Compass is installed, the computer is turned on, and has an active internet connection with all Certiport <u>whitelist IPs</u> accessible.

In most cases, the service only fails to launch if Compass was not installed as a local Windows Admin. If you have issues with the service launching, please use the <u>Admin credential</u> store.

Other icons: The first icon links to our support page, and the middle icon shows which <u>LAN mode</u> you are in: Stand-Alone (pictured), Compass Server, or Compass Client.

System check

The IT Administrator can use the System Check feature to ensure that a number of key exam administration elements are in place and ready prior to launching an exam for the first time. The recommended best practice is to use the System Check every time an exam is launched in case anything has changed on the exam delivery workstation. Each section can be expanded to check for any issues. In most sections, valid items will appear in **green text**, items that may interrupt testing will appear in **orange text**, while outstanding items that will prevent testing appear in **red text**.

Understanding Online vs Local exams

The Organization Administrator and IT Administrator should be familiar with online exams, local exams, and local LITA (Live-in-the-Application) exams.

- **Online:** The exam content does not need to be downloaded through the exam management menu; the data is retrieved via the internet as the exam is being administered. This option relies more heavily on bandwidth.
- Local: The exam content is downloaded through the exam management menu prior to taking an exam and is stored locally on the machine. This option is less dependent on bandwidth.
- **Online LITA:** The exam content does not need to be downloaded but some local files are downloaded through the exam management menu. These exams require the corresponding software (e.g., Adobe Photoshop) to be installed on the local machine. An internet connection is still required.
- Local LITA: The exam content is also downloaded through the exam management menu and stored locally. These exams also require the corresponding software (e.g., Microsoft Excel) to be installed on the local machine. An internet connection is still required.

Not all exams or localizations are available in every format. The default management of exams is local mode.

The Organization Administrator can choose to remove any downloaded exams if your CATC is no longer administrating them, or if they are part of retired programs that Certiport no longer supports. Deleting such exam content is not required but can free up disk space on your testing workstation.

Select the Manage Exams menu. 1.

2. Locate the exam you want to delete and click **Remove this exam**.

Installed Exams			Download Additional Exams
Program	Exam	Config Exam	
Autodesk Certified User	Autodesk Certified User: AutoCAD 2023 (Next Generation)		Remove this exam
IC3 Digital Literacy Certification	IC3 GS5 - Computing Fundamentals		Remove this exam

This action only deletes the local exam content and does not prevent you from downloading and administering the deleted exam(s) again in the future as long as the program is still actively available from Certiport.

Configuration exams

The Org Admin can run a config exam as a best practice when administering the MOS or Adobe LITA exams. Config exams are a way of ensuring that Compass is properly communicating with the locally installed software prior to launching an actual exam. All available config exams have the exact same **Technical Requirements** as the certification exams but do not consume a payment method to utilize.

- 1. Select the **System Check** menu and open the **Configuration Exams** accordion.
- 2. For MOS, ensure the config exam has been downloaded. (Downloading will place a separate line-item for the config exam in the Manage Exams menu, where MOS config exams can also be launched; Adobe config exams do not require a download.)
- 3. Click the Launch Config Exam button.

Certiport Authorized Test Center	*	Office Compatibility	*
Program Information	~	Configuration Exams	^
Product Information	~	Multiplatform Animation using Adobe Animate 2024 (v 24.x)	
Device Readiness	*	Visual Effects & Motion Graphics using Adobe After Effects 2024 (v 24.x)	

- 4. The tutorial will launch. Click **next** through the tutorial.
- 5. A live version of the exam will appear. Click **next/submit/forward arrow** to proceed.
- 6. Click through the additional sections (score, etc.). When completed, Compass will exit.

Config exams are only available in English for the MOS & Adobe 2024 Livein-the-Application exams. These are only one facet to successful exam delivery; please ensure that all <u>Technical Requirements</u> have been met.

Exam previews

Test Candidates can now preview certain 2024 Adobe Certified Professional exams using Compass for Windows. The Exam Preview is a full Config Exam *plus* the <u>exam</u> <u>tutorial</u> and a look into the exam's user interface and different item types. Running an exam preview does not consume any payment method, and after the preview is completed, Compass for Windows will exit. To launch an exam preview:

- 1. The Test Candidate logs in to Compass for Windows.
- 2. Skip the Exam Group and Voucher selection screen by clicking **Next**.
- 3. Select **Adobe Certified Professional** in the exam title filter and any exams with a preview will have a small link that says **Preview** next to the blue button to launch it.

Export update files

Import update files

Import/export update utility (optional)

The Organization Administrator can export exam content updates from the export server and then import the updates on the import client exam delivery workstations. This feature does <u>not</u> distribute system updates.

This feature is a partial alternative to the LAN Solution (LAN Settings) for transferring downloaded exam content to other exam delivery workstations, as opposed to downloading exam content individually via the internet. This feature allows you to "export" the exam content onto another exam delivery workstation via external media.

Export update files

1. On the Export Server, select the Import / Export menu.

2. Specify the location to export the files to. This may be on the local hard drive, an external hard drive, or a USB thumb drive. (Network locations are not supported.)

Exam group details

 $\frac{2}{2}$ / Candidate determines if they want to associate the exam with an exam group. $\hbar I$ Select Yes to associate the exam with an exam group, or leave the switch set to No and proceed to the next section. Use of exam groups is optional.

An exam group is a unique identifier that can be set up to track a Test Candidate's exam results, connect a teacher with a classroom, and opens additional reporting features by grouping a select set of candidates together.

For details regarding exam group setup, see the Exam Groups Quick Reference Guide.

- 1. When using exam groups, **select** it from the drop-down list. – or –
- 2. **Type** the exam group name in the text field. This is supplied by the proctor.

3. Select the **Next** button if you are not using a Voucher or see next section.

Office detection & messaging

If a Microsoft Office Specialist (MOS) exam is selected, Compass will warn a Test Candidate and provide them with options should they attempt to launch a MOS exam that is different or incompatible than the currently installed version of Office.

Micros	Microsoft Exam Version						
Selected E	kam: 77-725: MOS: Microsoft Office Word 2016						
A	You have selected a Microsoft Office 2016 exam and since Microsoft 365 Apps and Office 2019 is installed on your computer, we prepared the Microsoft 365 Apps and Office 2019 exam for you. Please click "Next" to continue. Otherwise, please contact your Proctor or Administrator for assistance.						
Previous	Next						

Use the <u>System check</u> settings under the Compass configuration section in this document for more information on validating an Office version that is supported for MOS exam delivery.

For detailed information on MOS Live-in-the-Application LITA) delivery, please refer to the <u>companion guide</u>. For **Adobe LITA**, see its program support <u>page</u>. For **Autodesk LITA**, see its program support <u>page</u>.

Verify information

Candidate verifies that the Candidate, Exam, and Language Information are correct. The payment type is listed in the *Payment type* column.

Candidate, pleas	se verify that the following information is cor	rect.	
Candidate & E	xam Information		
Name	Exam details	Test center	Payment type
Alice Lane	IC3 GS6 Level 1 Change exam		Inventory / Site Licenses
	Language: English		
	Accommodations: None		
	Duration: 00:50:00		
	Exam Group: None		

2. If the wrong exam was selected, the candidate selects the **Change exam** link in the Exam details column and then follows the flow to enter a voucher.

Select exam language

 \sim_{-1} The exam language defaults to the same language that was selected for the Compass user interface, but only if the exam is available in that language, and only for **Online exams**. If the candidate wants to take an *online* exam in a different language than currently selected in the user interface, they can click **Change Language** and select the language. Exam localizations will vary, please see our Exam Releases page for availability.

Candidate,	please verify that the following information is correct.		
Candidate	e & Exam Information		
Name	Exam details	Test center	Payment type
Compass D	emo Exam Example One		Voucher
	Language: English		

If you do not see the **Change language** button, you are taking an exam that does not allow you to change the language at this point in the exam launch pathway.

Local Live-in-the-App (LITA) exams require the Windows regional settings, the locally installed software, Compass, and the exam to all be set to the same language. Click here for detailed info.

1. If all the information is correct, the candidate **notifies the proctor** that they are ready to begin the exam.

 \gtrsim $_{
m /}$ CATCs using a shared license model of the locally installed Microsoft Office nt software required for Live-in-the-Application testing will be prompted for action when administering MOS exams. These actions may include activating the software (if opened for the first time), or signing into the application. Compass opens the software and addresses any one-time or other prompts from the application prior to the exam to avoid anything that may cause an interference during actual testing.

1. **Read** through the **steps** outlined in the prompt.

roo. microsoft frord	(Word and Word 2019)

Troubleshooting

Troubleshooting Compass

If you are having testing issues, check the system configuration tips below. You must apply these settings to any proxy, firewall, content filter, or other security device that is set up on your local machines or local network. If your institution is part of a larger network, such as a district, county, or other parent institution, you must provide this information to your network administrators. Also see our <u>full technical</u> <u>requirements list</u> for Compass for Windows.

- Ensure that HTTPS Inspection is turned OFF. This can be very resource intensive, as it decrypts and encrypts each packet, and it is typically turned on by default with most firewalls, so it is important to check before testing.
- Check for any cap limitations on your HTTP and HTTPS communications. If either or both are capped at a certain MB limit, the limitation could affect testing.
- Ensure the HTTP (80) and HTTPS (443) ports are fully opened and can communicate freely.
- Check that the following domains are set as approved/unblocked and given the highest priority:
 - http://*.certiport.com & https://*.certiport.com
 - http://*.pearson.com & https://*.pearson.com
 - http://*.pearsonvue.com & https://*.pearsonvue.com
 - http://*.starttest.com & https://*.starttest.com
 - http://*.starttest2.com & https://*.starttest2.com
 - http://*.startpractice.com & https://*.startpractice.com

Troubleshooting

- http://*.programworkshop.com & https://*.programworkshop.com
- http://vueapbrowser.starttest.com/?program=CertiportSB
- http://*.gettesting.com & https://*.gettesting.com

On certain systems, it may be necessary to enter the whitelisted domain name without the use of the wildcard asterisk (e.g. "https://certiport.com").

As a consequence of Certiport's data center transition in September 2023, it became impossible to provide a list of IP addresses that must be accessible for an uninterrupted exam experience. Therefore, we are now requiring *.certiport.com to be whitelisted.

Appendix A: Support

Contact support

Find answers online

Troubleshooting

- Check that any anti-virus and security programs or other scans are not set to scan daily during testing times. It is not necessary to completely disable auto-scanning for these programs, but it is recommended to set scan times that will not occur during testing.
- If the options above do not fix the issue, you may also need to apply these settings to the Windows Firewall or any anti-virus program on each local computer; however, you should try it on one machine first.

Anti-virus and security programs include products such as Norton, MacAfee, AVG, F-Secure, and more. Adjusting the settings for each will vary, but in general, you will want to add the domains or IP addresses above to that program's list of safe sites or safe zone.
